06 SPARK

- 06 **Top Projects**
Creativity is all around us!
- 16 **Objet 3d'art**
Form meets function in 3D-printed steel
- 18 **Meet the Maker: Andrew Ziminski**
What it's like to use tools from 2000 years ago
- 22 **Columns**
Why CircuitPython is the future of digital making
- 24 **Letters**
Continuing our endless love for free-form circuits
- 26 **Kickstarting**
Clothing to signal your group identity
- 28 **Hackspace Maker Works**
They make things in Michigan – lots of things!

33 LENS

- 34 **Electronics**
The components and modules to make your circuits soar
- 52 **How I Made The Mask**
Paranoid about state surveillance? Make one of these!
- 58 **In the Workshop Ultrasonic pong**
Play this classic game without getting your hands dirty
- 62 **Interview York Robotics Lab**
"Mummy, Daddy, where do robots come from?"
- 70 **Improviser's Toolbox Toothpicks**
Sharp mini tree-trunks for quick and easy builds
- 74 **Breaking 3D prints**
Test the strength of outlines and infill densities

120

Cover Feature

ELECTRONICS

Build better, stronger, faster, higher, circuits

34

Tutorial

Raspberry Pi audio

86 How to wrangle decent audio out of your Raspberry Pi

114

Direct from Shenzhen

Component tester

112 Identify the odds and ends in your component drawer

77 FORGE

- 78 **SoM CircuitPython**
Manipulate the brightness of LEDs with dithering
- 80 **SoM Precision boring**
Make holes bigger with confidence and control
- 84 **Tutorial Welders**
Pick the right stick welder for your workshop
- 86 **Tutorial Raspberry Pi audio**
From beeps and fizzes to high fidelity sound
- 90 **Tutorial Shop organisation**
Attain tool-based omniscience
- 92 **Tutorial Belt drives**
Get power from where it is to where you need it
- 96 **Tutorial 3D-printed vase**
Explore effects in Cura
- 104 **Tutorial BeagleBone gamepad**
Low-latency IO using programmable real-time units

Interview

Dr James Hilder

62 How does one go about building a robot? We asked an expert

111 FIELD TEST

- 112 **Direct from Shenzhen Component tester**
Find out what spare bits and bobs you have lying about
- 114 **Best of Breed**
Electronics kits for young and old
- 120 **Can I Hack It?**
Add a coin slot to your builds and make a fortune
- 122 **Review Prusa SL1 and CW1**
Prusa's new resin printing system
- 126 **Review Pokit**
A handy crowdfunded pocket multimeter
- 128 **Review AmbiMate MS4**
Many sensors, one board, one vision

Some of the tools and techniques shown in HackSpace Magazine are dangerous unless used with skill, experience and appropriate personal protection equipment. While we attempt to guide the reader, ultimately you are responsible for your own safety and understanding the limits of yourself and your equipment. HackSpace Magazine is intended for an adult audience and some projects may be dangerous for children. Raspberry Pi (Trading) Ltd does not accept responsibility for any injuries, damage to equipment, or costs incurred from projects, tutorials or suggestions in HackSpace Magazine. Laws and regulations covering many of the topics in HackSpace Magazine are different between countries, and are always subject to change. You are responsible for understanding the requirements in your jurisdiction and ensuring that you comply with them. Some manufacturers place limits on the use of their hardware which some projects or suggestions in HackSpace Magazine may go beyond. It is your responsibility to understand the manufacturer's limits.
